

FOR IMMEDIATE RELEASE

Boston Litigation Solutions Announces Early Case Assessment Alliance with Digital Reef

Boston, Massachusetts (October 22, 2009) – Boston Litigation Solutions (“BLS”) - a leading eDiscovery and litigation support service provider - today announced that they will be utilizing the Digital Reef platform to power their Early Case Assessment (“ECA”) services. Digital Reef is the developer of the first massively scalable information management, governance and discovery platform.

As enterprises have begun to scrutinize litigation costs and recognize that 70 percent of the costs lie in document review, there has been an increased interest in ECA to reduce the amount of potentially responsive information to review. Boston Litigation Solutions will use the Digital Reef platform to provide advanced filtering and analytics capabilities to clients. BLS customers will benefit not only by greatly reducing the cost of document review, but also from the ability to make faster, more-informed decisions on legal matters.

“Providing value-add analytics to our customers is a must and to do so at the scale that Digital Reef provides gives us a huge competitive advantage with clients looking for smarter information management and streamlined eDiscovery services,” said Kevin Glass, Managing Partner of Boston Litigation Solutions.

Digital Reef employs sophisticated analytics to remove duplicate and irrelevant content – significantly reducing the amount of information that has to be reviewed manually. By paring datasets into manageable volumes, businesses make better use of internal resources for legal reviews, plus reduce outside review costs.

“The need to utilize advanced analytics to reduce litigation costs has never been greater,” said Bob Lentz, president and CEO of Digital Reef. “We are pleased that Boston Litigation Solutions can leverage the Digital Reef platform to provide more value to customers with advanced filtering and ECA services.”

About Boston Litigation Solutions

BLS offers a full range of straight-forward, cost-effective litigation support services including ESI processing/eDiscovery, document review hosting solutions, early case assessment/data culling services, forensic data harvesting, software assisted document review tools, near-duplication & email threading, as well as a full array of paper services. BLS’ capacity, pricing, and responsiveness can not be matched. BLS utilizes the best

technologies available to lower costs and provide the most powerful end results. For more information about the company and its services, please visit www.bostonlit.com. For more information about BLS' Chicago office "Chicago Litigation Solutions" visit www.chicagolit.com.

About Digital Reef

Digital Reef provides a smarter way to manage information – it automatically discovers, processes, analyzes, and classifies information assets (e.g. Email, file system content, SharePoint content, desktop content) in place. With Digital Reef, organizations now have a tool to address eDiscovery collection and ECA challenges in way that is both scalable and cost-effective. Organizations across all industries use Digital Reef to significantly reduce the costs associated with eDiscovery and compliance readiness and arm themselves with the information necessary to make fast, informed decisions. Founded in 2006, Digital Reef is headquartered in Boxborough, Mass. For more information call 978-893-1000 or visit www.digitalreefinc.com.
