

FOR IMMEDIATE RELEASE

BLS Partners with Equivio to Offer Relevance and Near-Duplication Services

Boston, Massachusetts (June 12, 2009) - Boston Litigation Solutions has partnered with Equivio to offer grouping of near-duplicates and email thread generation. By grouping similar documents, Equivio users gain a decisive competitive advantage -- slashing the time and cost of document review, while ensuring the consistent treatment of similar documents.

The scale of the near-duplicate phenomenon is immense -- in typical enterprise environments, 30-50% of files are near-duplicates. This translates into huge hidden costs whenever people need to manage, search or review documents. With Equivio, this cost burden can be eliminated.

BLS customers can now benefit from less costs, less review time, and less risk involved with document productions. Proven in hundreds of cases, Equivio's technology consistently reduces review and handling costs by 25% and more. Equivio enables prioritized review by zooming in on value-added, unique data, ensuring that critical information is not missed.

Give us a call today at 617-933-9780 to see how BLS and Equivio zoom in on unique data, allowing you to read less, think more, win big™.
